

## Western Australia's Model Solar Car Challenge 2011

### Expression of Interest

The Sustainable Energy Association of Australia (SEA) is committed to a sustainable energy future for all of Australia and we are proud to be hosting the Western Australian Model Solar Challenge this year.

Our focus for this competition is to connect with school students and to educate them on better ways to use and conserve energy.

The responsibility of working in teams combined with the planning and approach of the overall project can lead to the development of skills and personal qualities in students beyond what is possible in the classroom.

We encourage you to register your interest on behalf of your school and students for this challenge to help educate our children of today and promote the benefits of a more sustainable lower carbon future.
